

swetswise | Selection Support

The most efficient way to evaluate your journals collection

SwetsWise Selection Support is the most complete evaluation and analysis tool currently available for making collection development decisions. In order to extract the most value from your library's collection you need to be able to balance a number of factors including cost, usage, impact factor and relevance. Swets understands that manually collating usage statistics, impact factor and cost information is a challenging endeavour. We can help.

By combining usage statistics and impact factor with subscription information into a single, easy-to-use environment, SwetsWise Selection Support delivers the most complete and reliable information necessary to determine the inherent value of your collection directly to you in the most efficient, clear and affordable manner.

SwetsWise Selection Support utilizes the powerful and award-winning technology behind the ScholarlyStats platform to collect usage statistics. It integrates this data with the extensive subscription details, price information and an Impact factor via SCImago Journal Rank (SJR) stored in SwetsWise Library or Corporate Edition. This provides you with a pre-populated, complete overview of all subscription, price, impact factor and usage information for all journals ordered via Swets. In addition, you can enter the information for any other subscriptions you may have to ensure you can retain a complete overview of your entire collection. You can then use the extensive reporting section within SwetsWise Selection Support to create specific, customized reports and charts, including the ability to calculate the price per use of an individual subscription or package. These reports will help you to fully analyze your entire subscription spend and make better informed collection decisions for the future.

Benefits of SwetsWise Selection Support

powered by
scholarlystats

Save time and increase your efficiency

- Pre-populated publication overview with journal, price, impact factor and usage information for all subscriptions managed via SwetsWise
- Automatic collection of usage statistics, using award-winning ScholarlyStats technology
- Retain a complete overview of your entire journal collection by uploading additional publications and/or price and usage information
- Create packages of individual titles and subscriptions to reflect any specific deals you have negotiated with publishers

Make better informed collection decisions

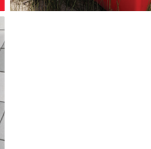

- Utilize a wealth of standardized reports to uncover the underlying usage trends of your collection, including low-usage journals, price per use
- Impact factor trend analysis reports for any period in time going 10 years back
- The sophisticated reporting functionality provides you with the tools to create a range of tailor made, user specific reports
- Easily compare journals, packages and databases from different publishers to find the inherent value of each publication
- Create different types of charts for direct insight into usage and price per use

Unique possibilities for Consortia customers

- Share usage information with your consortium
- Create consortium-wide reports for usage information
- Analyze the usage behaviour of the consortium's collection by supplier, individual institution or as a whole
