

SWETSwise

Searcher Enterprise Edition

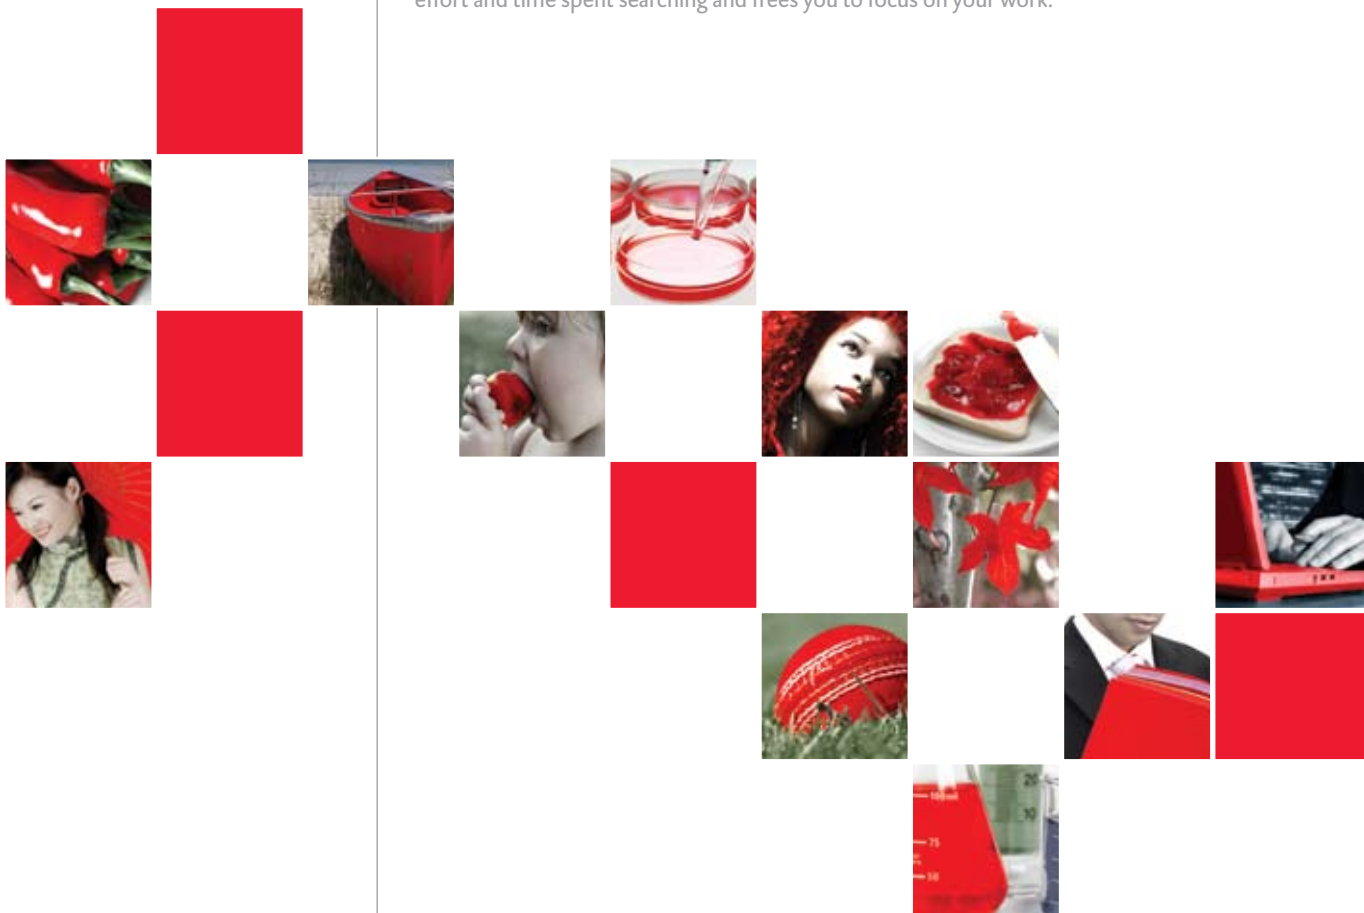

Reduce search time across your entire organization

SwetsWise Searcher Enterprise, our innovative federated search solution, simplifies searching across multiple, disparate sources by organizing search results into logical categories viewed from one, easy-to-use interface.

Swets understands that users of all kinds with different research needs around the globe are faced with the same challenge: how to efficiently find and access the content they need from the vast supply of material available. SwetWise Searcher Enterprise can help.

From catalogs to digital print collections, electronic journals, internal databases and the Internet – users search it all from SwetsWise Searcher. Search results are de-duplicated and ranked automatically, helping users access the most relevant content. This reduces their effort and time spent searching and frees you to focus on your work.

Enable information discovery with SwetsWise Searcher Enterprise

SwetsWise Searcher Enterprise does more than improve the relevancy of results. At the heart of SwetsWise Searcher is its unique metasearch and clustering technology from Vivisimo that organizes search results from diverse sources “on the fly” into dynamically built, logical, natural language categories. Users quickly discover new content and see trends and patterns that are often overlooked.

How this fits in with your overall SwetsWise solution

Our SwetsWise portfolio of services integrates all the tools you need to acquire, access, manage and evaluate your subscriptions. SwetsWise Searcher Enterprise, our comprehensive federated search tool, is implemented on your servers and gives you full control over the administrative functions of the service, as well as the ability to select the content sources and customize the features displayed to your users. This increases the use of your organization’s valuable collection and even allows you to expose important content that is stored in internal databases.

In addition, SwetsWise Searcher includes a free connector to SwetsWise Online Content, delivering a single connection to the most extensive collection of e-journals available. Add this to the advanced browsing and linking functions built into SwetsWise Linker and SwetsWise Title Bank and you can ensure that your end users are given the ultimate environment in which to access and find information.

How does it work?

- **Easy to install, smooth to implement:** SwetsWise Searcher is installed locally on your own servers and implementation is fully supported to ensure you are up and running quickly.
- **No special skills or training needed:** A single free-text search box helps users get started fast. Anyone familiar with folder-based interfaces can easily navigate through SwetsWise Searcher.
- **Users choose the scope of searching:** Based on user’s selections, SwetsWise Searcher can check your entire range of resources, a single resource or a select few, whether they are linked to your SwetsWise solution or not. The refined and advanced search capabilities included in Searcher will ensure that the results obtained will be relevant to their research.
- **Clustered results lead to better research:** Unlike other search engines, SwetsWise Searcher eliminates long lists of search results and cleverly organizes those results into clusters, or categories, of information. It places related articles into a single folder for joint viewing. It also de-duplicates all results, ensuring that the results are easy to read and analyze.
- **Fully customizable:** Searcher is a flexible tool that offers extensive customization. You can tailor the look and feel of the interface itself, including your organization’s branding if desired. You can also customize the rights and search boundaries for each of your users, therefore retaining complete control over your entire holdings without losing any of the capabilities or functionalities of the program itself.
- **Automatic updates:** Technical Support for SwetsWise Searcher is handled by Vivisimo, developers of the clustering technology at the heart of the program. SwetsWise Searcher automatically checks, fixes and updates the connectors to resources, meaning there is little maintenance required.
