

SWETSwise Linker

Seamlessly integrate all of your library's resources

SwetsWise Linker is an OpenURL link resolver that seamlessly integrates your organization's diverse licensed resources, creating a sophisticated yet easy to use research environment for your end users.

Swets understands that you have carefully selected the most important content for your users' wide-ranging research needs so you need to ensure maximum visibility and usage of that information. SwetsWise Linker will enable your users to find and access your licensed content easily, regardless of which resource they are searching or where the article resides.

Ensure quick, easy access to your licensed content

With SwetsWise Linker, users will no longer need to learn where access is located after finding the article they need. They can simply select SwetsWise Linker's dynamic link menu for access to the most appropriate copy from a library-defined listing of all available resources. Powered by Openly Informatics' proven technology, SwetsWise Linker helps users eliminate the time wasted spent digging through different resources. As a result, SwetsWise Linker facilitates usage of your library's licensed content, freeing you to spend more time on what's most important to you and your organization.

Easy access to one of the industry's largest knowledgebases

- Knowledgebase of more than 90,000 serial publications
- Select from over 560 different resources
- Easily discover what content is available in which resource
- Entire knowledgebase updated automatically on a monthly basis
- Powered by Openly Informatics' proven 1Cate technology

Simply manage and maintain your entire collection

- Automatic addition and maintenance of all subscriptions handled by Swets
- Easily load and update your additional collection information
- Online reports to help track usage across your organization

How does SwetsWise Linker fit in with your overall SwetsWise solution?

Our comprehensive SwetsWise portfolio of services integrates all the tools you need to acquire, access, manage and evaluate your subscriptions. SwetsWise Linker simplifies your end users' research environment by fully integrating your entire list of resources into a single, searchable interface. When combined with the federated search capabilities of SwetsWise Searcher, you will provide your users with the ultimate environment in which to effectively search and access your organization's resources, find the most relevant sources and link to the most appropriate copy.

User Features & Benefits

Comprehensive linking: Helps users quickly find and access appropriate copies of all licensed resources, saving time and improving research.

Easy navigation: Flexible dynamic link menu can be used regardless of which resource is searched and where the article is located and enables easy navigating references between resources.

Citation look-up: Users can look up citation information to see if your organization has licensed access to specific citations. Selections include:

- Journals and articles
- Books
- Patents
- Dissertations
- Generic

Export bibliographic data: Helps users automatically manage bibliographic data, saving substantial time and effort.

Administrative Features & Benefits

Web-based administrative tools: Remotely update your collection and control the features and options available to your users, efficiently tailoring the application to your needs. You can:

- Easily load and update your collection information from an embedded knowledgebase with links for more than 90,000 serial publications
- Enable links to your organization's extended services, such as open access catalogs, inter library loan, document delivery and book suppliers
- Customize the interface to match your organization's branding

Comprehensive linking: Ensure maximum visibility and usage of your valuable content.

Extensive knowledgebase: Access one of the industry's largest knowledgebases of what content is available in which resource, as well as receive automatic monthly updates.

Hosted IT Environment: Eliminates the time and effort required to maintain a service hosted on your servers.

Online Reports: Track usage and activity across your organization to better assess your collection decisions.

EZProxy off-site authentication: Allow off-site user authentication for easy remote access.

CrossRef® Module: Enable your organization to provide access to the CrossRef® hyperlink reference system using available software.
